START GUIDE

A Z O M WATCH

THANK YOU FOR CHOOSING A Z O M PRODUCT!

To have a comprehensive understanding of and using this device, to know all the features and simple operation methods, please read this manual first.

Package: In 1 box: 1 AZOM Watch, 1 User manual, 2 Watch straps (White + Black), 1 Charging cable.

Remark:

The product supports waterproof with IP68 level, you can wear it while washing hands, swimming, in rainy weather, etc.

⚠ Do not use it during a hot shower/bath or sauna, the vapors will get into the host, which causes damage to the watch components. All these are beyond the scope of the warranty.

Buttons Instructions:

Upper button: Press to wake up the screen, press again to enter multiple activities model.

Bottom button: Long press to switch ON/OFF the watch, short press to wake the screen up and to turn the screen off.

Touch Instructions: Tap to select and enter the menu, slip right to return. At the home screen, slide down to go to the status bar, slide right to the notification center, slide left to enter the main menu, slide up to weather conditions. Tap to wake up the screen.

Watchband change: There is a switch button to take the band off changing the back-case connector with the band.

Charging instruction: This product adopts magnetic force charging. Connect the charging point to the back of the device charging pins, it will charge automatically. It usually takes 2 hours to fully charged.

Standby time: up to 30 days.

Working time: 5-10 days.

Note: please do not use the watch while charging.

Connecting the watch to the Phone:

Download “AZOM Watch” app on the Phone by using one of the following methods:

1. Android/iOS Phone: Scan the following QR code image by browser or by any Scanner to download “AZOM Watch” app.
2. Android Phone: search and download “AZOM Watch” app from Google Play.
3. IOS phone: search and download “AZOM Watch” app from App Store.

After installation, turn on the Bluetooth on your cellphone and “AZOM Watch” app, make sure the notifications and all other permissions are enabled and fill up personal information. Tap “Add device”, search “AZOM Watch” device (turn on the GPS in the smartphone before binding) and tap connect.

As the Bluetooth protocol is different among all the phone brands. Sometimes the Bluetooth connection will be instable between mobile phone and smartwatch. Please restart the Bluetooth, then try to connect again.

Firmware upgrade: When Bluetooth connected, in the same interface of “AZOM Watch”, click “Mine- “My device”, if there is new firmware available, click to update to the latest watch firmware version.

Notice: If the Firmware failed to upgrade, please reconnect the Bluetooth and try to upgrade again.

Main Features:

Language/Time/Date: It will synchronize the date & time from the phone when Bluetooth is connecting.

Standby interface: On the home page, long press the screen for 2 seconds to change dial pads.

Watch faces download: Enter "AZOM Watch", Dials, select the desired watch face to download, wait for few seconds to complete downloading, every time new watch face downloaded will replace the last one in the watch face menu.

Notifications: Slide right to enter Notification menu; Synchronize all the phone notifications, such as Facebook, WhatsApp, SMS, Email, etc., To display the notifications with content of Facebook and WhatsApp please setup the notifications function of the Apps in the phone, it will vibrate for incoming calls and messages.

Activity info: Showing the health data including Steps, Mileage, Calories of the day and it will be saved at 12 o'clock every night then reset to in the coming day. You can find all the saved data inside the history.

Work out: Select one activity mode to record your workout. It will pause when slides right. Each exercise data includes exercise time, calorie consumption and heart rate. Click this  to enter more modes options, click the sports icon menu to scroll to the first, and then click the middle to enter. Click   to page up and down, and click  to return.

Health

Heart rate: Wait for two seconds to start measuring and recording the heart rate data by scanning the surface capillary of the skin by the green optical, slide to other menus to stop measuring. Normally it will be 60-90 bpm, professional athletes may be less than 60 bpm. When doing strenuous exercise, the rate may reach to 200 bpm. Keep exercising can increase heart rate and lung function.

Blood pressure: When monitoring, please put your hands flat, the data will come out after a few seconds. Blood pressure tends to increase with age, and women have a lower blood pressure than men.

ECG: Start immediately after the entry. The technology of combining the optical heart rate and the electrocardiogram takes about 10 seconds to output the data. The interface will appear  after the measurement is completed, data save in AZOM Watch App.

Blood Oxygen: SPO2H, it is the percent of oxygen in blood, normal rate is 94-99%.

Sleep monitor: The smart watch will turn on it automatically from 10p.m to 8 a.m. You can check the details of sleep quality by smart watch app.

Stopwatch: Press the start and pause, again press for stop.

Music Remote control: Play the music in the phone, control using the watch.

About: Tap to enter, check the watch model, firmware version, Bluetooth Mac address.

Reset: Tap to Reset the watch, all the data will be cleaned.

Alarm: Set several alarm clocks through the App in the phone.

Sedentary Reminder: You can set time to remind yourself stand up.

Find your phone: Once you tap it, the phone will make a ringtone alert.

Wrist screen: Set it in the App, it takes more power consumption when it is on.

Unit Setup: Metric or British system.

Data transmission: All the data will be saved in the device. No matter pedometer, heart rate, sleep quality, and multi-sport mode, the data all can be transmitted to the APP in the phone.

Warranty

1. If any quality problems occurred caused by manufacturing, materials or design within two years (since the date of purchase), we will offer a free warranty Assuming the product is being used normally and correctly.

2. For accidents and misusing the product, we don't offer a free warranty, as follows:
